Education

Sep. 2023 - Present: B.Eng. in Artificial Intelligence

Shanghai Jiao Tong University, Shanghai, China

Average GPA: 3.6/4.3

Rank: 63/98

Honors

2023 - 2024: Zhiyuan Honors Program

Selected honors program at Shanghai Jiao Tong University.

2023 - 2024: Zhiyuan Honors Scholarship

Scholarship recognition during undergraduate study.

Internship

2025 - Present: Research Intern

SJTU CVL Lab

2025

- Explored computer vision fundamentals through research practice.
- Participated in research on wafer edge detection and defect detection.
- Studied vision-based inspection scenarios related to wafer manufacturing data.

2026

- Reproduced ViTPose++ and ViTPose pipelines for occluded human and 21-keypoint hand pose estimation.
- Participated in building an automatic and interactive multi-camera hand-marker annotation tool and used it to annotate over 90k images.

Research Interests

Current Focus: Computer Vision

Broader Interests: Agents, Large Language Models, and interdisciplinary AI applications.

Skills

Programming Languages: Python, C++

Tools: Git, Jupyter, LaTeX

Agents: Codex, Trae

Languages: English (Fluent), Chinese (Native)

Projects

Mianyang CS Web

Web Platform / Tournament Management

- Contributed to building a platform that integrates tournament management and the player ecosystem for Mianyang Counter-Strike competitions.

RAG Teaching Assistant

Python / RAG / LLM

- Built a Python project exploring retrieval-augmented generation for teaching assistant scenarios.

MovieLens Hybrid Recommender

Python / Recommender Systems

- Developed a recommender-system project based on the MovieLens dataset and hybrid recommendation methods.

Deep RL Atari MuJoCo

Python / Deep Reinforcement Learning

- Implemented a repository for deep reinforcement learning experiments in Atari and MuJoCo environments.
